

**TATA MD**  
**CHECK**  
**RT-PCR FAST**  
**3 GENE**

# Super-fast and variant-proof COVID testing

- 40 minutes fast amplification
- 3 genes + IC (E, N, RdRP, and Human RNase P) single tube
- 100% Sensitivity, 100% Specificity
- Highly accurate for all common variants, including Delta
- Compatible with widely used 4+ channel real-time PCR platforms
- Same qPCR workflow made faster

KIT COMPONENTS	VOLUME
2X Master Mix (2 Nos.)	625 µL each
20X Primer and Probe Mix (1 No.)	125 µL
Nuclease Free Water (1 No.)	1250 µL
Positive Control (1 No.)	100 µL
